AT-A-GLANCE

PRODUCT TYPE	Traffic Cone
PRODUCT STYLE	Orange Body & Black Base With 2 Reflectors

STANDARDS

Meets MUTCD Nighttime Requirements

OVERVIEW

VERICOM[®] 28 INCH TRAFFIC CONE - ORANGE BODY AND BLACK BASE WITH REFLECTORS

Durable, portable, brightly colored, and certainly a great attention-grabber, this traffic cone boosts safety measures to an even higher level. Reflective collars make the cone easily recognizable and highly visible to provide an immediate warning about road obstructions or to designate proper traffic lanes. Apart from controlling traffic flow, this cone can be used to limit access to particular areas, warn of hazards and dangerous situations at construction sites, and provide safety messages in hallways and corridors (e.g. mounting a "wet floor" sign on top of the cone). No matter the scenario, our traffic cone is the perfect solution for keeping work hazards at bay.

APPLICATIONS

Control Traffic Flow
 Warn of Hazards and Dangerous Situations
 Mark Off Restrictive Areas
 Provide Safety Messages

FEATURES

Made from heavy duty PVC for durability
 Reflective collars on body for visibility in all directions
 High resistance to extreme temperatures, UV radiation and a variety of other weather conditions

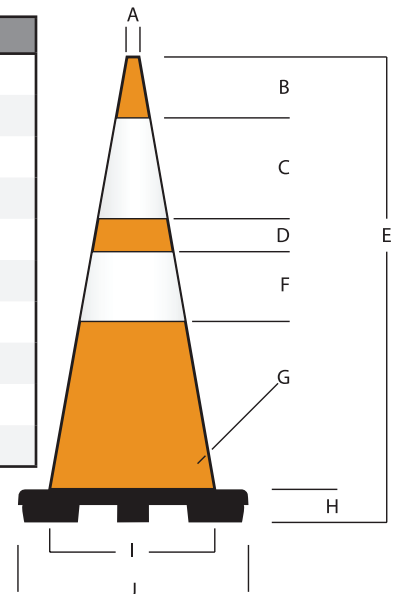

SPECIFICATIONS

Available Height	28 Inches
Available Weight	7 lbs
Body Material	UV Stable PVC
Body Color	High Visibility Orange
Base Material	UV Stable PVC
Base Color	Black
# Reflective Collars	2
