VGS™ One Step Termination Tool

Applications

The Vericom VGS™ One Step Termination Tool can be used for the simultaneous seating and quick termination of 22-24 AWG Category 6 and 6A Cable into our VGS6™ and VGS6A™ keystone jack modules.

Description / Specifications

The VGS™ One Step Termination Tool saves time and improves accuracy by seating and terminating all wires simultaneously with a quick, easy squeeze of the handle. The integrated blade cuts and removes excess wire after seated in the connector, eliminating any need for extra trim steps. Built for simple one-handed operation, with an ergonomically designed handle for maximum grip and comfort, this termination tool minimizes hand fatigue and helps reduce installation stress.

Ordering Information

Description	Item Number
VGS™ One Step Termination Tool	NT1001
Replacement Head	NT1001-REPL

Features & Benefits

- Terminates jack modules faster than traditional termination tools
- Fully seats and terminates all conductors simultaneously
- Provides reliable, high grade terminations- say goodbye to compromised connections and re-terminations
- Simple, one handed operation with ergonomic handle for grip and comfort
- Minimizes hand fatigue and reduces installation stress
- Replacement Head (Item # NT1001-REPL) available for purchase if blades included with tool become dull or damaged
- Packaging: Sold Individually
