

LED Rechargeable Lithium-Ion Work Light

Applications

This LED Rechargeable Lithium-Ion Work Light is ideal for situations where an outlet or an extension cord is not available, including cable installation, construction, attics, crawl spaces, household projects, camping or emergency lighting.

Description / Specifications

The Vericom Rechargeable LED Safety Work Light utilizes a 10 Watt, high power, cool white, surface mounted LED. This light generates up to 900 lumens with a wide 120 degree beam pattern. The built-in rechargeable Lithium ion battery keeps any construction site, crawl space, or related area illuminated up to 3 hours and is completely recharged in 5 hours. The durable steel tube stand adjusts to an array of accommodating angles to give light where needed. Opposed to a halogen work light that gets too hot and is vulnerable to harsh environments, our safety light runs cool, is durable, rechargeable, and is designed with magnetic base feet for deployment alongside any truck or vehicle, in shipping containers or anywhere where it can be attached to metal. Most importantly, it can be placed or operated anywhere with no extension cord or outlet needed.

Features & Benefits

- Low voltage 10 Watt, high power, cool white, surface mounted LED that stays cool and is burn free
- 120 Degree beam pattern
- Explosion proof
- Built-in rechargeable Lithium-Ion battery
- Magnetic base feet
- Includes a 100-240V AC/DC adapter and a 12V-24V DC car charger

Standards Compliance

- RoHS Compliant
- CE
- IP65 Weather Resistant

Construction

Die-Cast Casing: Polished, finished Aluminum

Switch Housing: Weatherproof Aluminum with charging indicator

Battery: 7.4 V Rechargeable Lithium Ion 4.4 Ah

Lamp Dimensions: 5.7 in (L) x 6.3 in (W) x 9.5 in (H)

Mechanical

LED: 10 Watt

Max Output: 900 Lumens

Output Angle: 120°

Weight: 2.2 lbs

Battery Run Time: 3 Hours

Charge Time: 5 Hours

Environmental Conditions

Charging Temp: 0°F to 104°F (-18°C to 40°C)

Operating Temp: -4°F to 131°F (-20°C to 55°C)
