

## G-Series MPO-LC Transition Module

### Applications

MPO-LC Transition Modules convert an MPO connection into an LC Duplex connection. Vericom's G-Series MPO-LC Transition Modules are ideal for use with our G-Series High-density Optical Fiber Patch Panels in data center, local area network (LAN), and storage area network (SAN) applications.

### Description / Specifications

Vericom's G-Series MPO-LC Transition Modules are available in LC Singlemode or LC Multimode (OM4). Our G-Series transition modules provide the interface between the MPO connection and the LC Duplex patch cables that will connect directly into nearby operating equipment. These MPO-LC Transition Modules fit into our standard 19" G-Series High-density Optical Fiber Enclosures and can be combined with Vericom's B Polarity MPO assemblies and Standard Polarity Push Pull Fiber Patch Cords for a full Vericom Solution.

### Features & Benefits

- MPO to LC Conversion
- Fast and Toolless installation
- 1 MPO to 6 LC Duplex Adapters
- SM, or OM4 fiber available
- High performance color coded LC adapters for quick and easy identification

### Standards Compliance

- ISO/IEC 11801-5
- ISO/IEC 24764
- ANSI/TIA-942-A/B
- EN 50173-5
- UL94-V0
- RoHS Compliant

### Construction

**Dimensions (WxDxH):** 3" x 6.3" x 0.5"

**Shell Color/Material:** Black PC/ABS

**LC Ferrule Material:** Zirconia Ceramic

**MPO Ferrule Material:** Composite Material

**Adapter Type:** LC Duplex or MPO

**LC Singlemode Adapter Color:** Blue

**LC Multimode (OM4) Adapter Color:** Erika Violet

**MPO Adapter Color:** Black

### Performance/ Optical Specifications

**Operating Temperature (°C):** -10 to 60

**Durability (MPO):** ≥100 times

**Durability (LC):** ≥1000 times

**Capacity:** 12 Fibers

Density	MPO Insertion Loss (dB)	LC Insertion Loss (dB)	Return Loss (dB)
Single Mode APC	Std<0.7, ULL<0.35	Std<0.3, ULL<0.25	>50
OM4	Std<0.35, ULL<0.25	Std<0.25, ULL<0.15	>20
