VGS™ Fiber Cleaning Tools

Applications

The Vericom VGS™ Fiber Cleaning Tools are suitable for ensuring optical connections are free of dust, debris and other contaminants in order to maintain high-speed data transmission in data centers, optical faceplates, fields, labs, or other fiber network applications.

Description / Specifications

The Vericom VGS™ Fiber Cleaning Tools feature easy-to-use ergonomic designs and are available in multiple options to suit your fiber cleaning applications. These fiber cleaning tools are lint-free and offer a simple, inexpensive, damage free solution for maintaining a contaminant free fiber network without the use of ethyl alcohol. Our MTP® and MTP® brand MPO-Style Connector Cleaner supports up to 12 fibers simultaneously and is specially designed to efficiently clean the narrow end of MTP® and MTP® brand MPO-Style female connectors. Our SC/ST/FC cleaner is a damage-free solutions for removing dust, oil and other debris from 2.5mm adapters. Our LC cleaner removes contaminants from LC/MU connectors with just one simple press and is compatible with APC and UPC connectors. Our box type cleaner offers a convenient way to remove dust, oil and other debris from MPO, LC, SC, ST, and all standard fiber connectors.
